Risk Assessment

For the product / service:	Fun Casino Hire
Date of risk assessment:	14th August 2025 - valid until 13.08.2026

Statement of general policy	Action / Arrangements
Prevent accidents and cases of work-related ill health by managing the health and safety risks in the workplace	Sharing heavy loads and making short trips with lightweight equipment, to prevent possible injury to staff members.
Provide clear instructions and information, and adequate training, to ensure employees are competent to do their work	All staff inducted in methods of handling, moving and constructing equipment. Staff supervised whilst working.
Engage and consult with employees on day-to-day health and safety conditions	Correct number of staff always assigned to the work load at hand, and staff encouraged to request assistance where required.
Implement emergency procedures – evacuation in case of fire or other significant incident.	In the event of a venue evacuation or emergency, all Games Hire UK staff are required to meet at the company vehicle in the car park, and to report to the duty manager.
Maintain safe and healthy working conditions, provide and maintain plant, equipment and machinery, and ensure safe storage/use of substances	All staff shown how to safely move and use equipment.

Method Statement

Method statement in relation to:	Provision of 'fun casino' tables during live event
Date of method statement:	14th August 2025 - valid until 13.08.2026

Risk Assessment

This method statement was created in line with a specific risk assessment to the activity noted below, the purpose of both documents is to minimise the risk of injury or loss arising in connection to the main risks identified within the risk assessment, which are:

- Slips and trips
- Injury during construction
- Risk of electrocution
- Injury when lifting
- Overcrowding in playing area
- Adverse weather conditions

What does the task or activity involve?

Erection, use and dismantling of fun casino tables in public venues

Who is going to be carrying out the task?

Employees and contracted staff

What equipment, plant and materials are required to complete it?

Staff will use the company vehicle and transportation boxes with a trolley, or by hand, to move equipment safely to the event area. Staff will wear branded clothing to identify them, and occasionally use safety gloves to ensure a strong grip. Occasionally equipment will be carried by hand, which will only happen with a clear route and when it is safe to do so.

What training has the employee been given that will help them carry out the task safely?

Staff have been trained in-house and are well experienced at using this equipment. Equipment is transported and used in accordance with the manufacturers instruction.

How are employees going to enter or leave the working area?

Staff will safely park the company vehicle as close as possible to the loading area, before transporting equipment via any stairs, lifts or corridors to the event space.

What environmental risks are related to the task?

Weather - eg slippery surfaces from rain, ice or snow

Route - staff will ensure that paths, corridors, lifts and stairwells are clear of obstruction when moving equipment

Working safely

Staff will arrive onsite, parking the company vehicle safely and where possible in a marked bay. They will notify venue staff of their arrival and visually inspect the event space for suitability, and advise the venue staff of any potential issues or risks. Any obstructions to the event space or route required will be cleared and staff will return to the company vehicle to begin moving equipment.

Staff will unload equipment from the company vehicle and use the shortest route possible to the event area. Some equipment will be carried by hand, and where possible the majority will be moved with the aid of a sack barrow or trolley. On arrival at the event space, equipment will be grouped together in preparation for construction. Should any members of the public, venue staff or other contractors be using the same area, staff will verbally advise that equipment construction is underway and request that the space is kept clear.

Once all equipment is in the event space, staff will then begin construction, keeping a tidy workspace as they go. This is a relatively quick process as the equipment is designed to be put together quickly. Once all equipment is constructed, staff may run electrical cables from power sockets to the casino tables. All cables will run along a skirting board where possible and trip hazards will be eliminated by taping cables to the floor using adhesive tape.

During use, staff will visually monitor equipment for any issues and ensure that no unauthorised persons use, move or otherwise interfere with electrical equipment. Any persons using the equipment in a manner other than its intended purpose will be asked to leave the event space and will be refused further interaction with the equipment.

The packing down of the equipment will be carried out in reverse to the load in procedure, with staff taking extra care in regard to event guests who may be under the influence of alcohol and unaware of their surroundings or that unloading work is taking place.

Emergency procedures

Manager and staff are issued with a mobile phone to summon emergency assistance / contact main office as required. Accidents/near misses and incidents are reported to main office as soon as possible. Employees trained in Emergency Procedures.

Please give details of your first aid arrangements.

Manager has received first aid at work training and van has a first aid kit. Manager and supervisor issued with a mobile phone that they can use to call for an ambulance if required.
